

**EUROPEAN ASSOCIATION OF
CHEMICAL DISTRIBUTORS**

ORGANISATION	<u>European Association of Chemical Distributors. FECC</u>
Profile	<p>Fecc is the voice of the Chemical Distribution Industry in Europe, with an active membership of companies and national associations, representing around 1600 companies, many of which are small and medium sized companies (SMEs). Fecc and its members contribute to innovation and sustainability besides adding value in the supply chain, by sourcing, developing, marketing, and distributing a wide range of specialty chemicals and ingredients to over one million downstream users ranging from automotive, electronics, paint, construction to pharmaceutical, cosmetics, food and nutrition industries, each with their own specialised needs.</p> <p>Main activity: Chemical Distribution Territory: Europe Size of the organisation: < 10</p>
Previous experience in European projects	<p>1.Circular Plastics Alliance – An industry-led alliance supported by DG Grow aims to boost the EU market for recycled plastics to 10 million tonnes by 2025. Fecc is a technical stakeholder in the alliance</p> <p>2.EU-OSHA 2020-22 Campaign Healthy Workplaces Lighten the Load - Fecc is a long-standing partner of EU-OSHA and very much committed to “living” health and safety at the workplace. As a trade association representing around 1,600 companies in the chemical distribution sector – most of them SMEs - it is our priority to continuously share knowledge and best practices on working in a safe environment and take the necessary steps to prevent work-related health problems in Europe.</p>
Interests for future projects proposals	We could provide technical and stakeholder engagement expertise on projects related to safe and sustainable manufacturing and distribution of chemicals
Project ideas	We are involved in a project funded by the Danish ministry of environment on chemical waste and processing aids, and assessing the feasibility to loop them back into another processing cycle. We are searching for European or national stakeholders who could fund and support the project to see whether the same exercise is applicable to other regions or countries
3 key words	Circular Chemistry, Innovation, Partnership with EU projects
