

ORGANISATION	<u>Stam srl</u>
Profile	<p>STAM is a 24 years old engineering consulting company that supports its clients in addressing new businesses and technology challenges leveraging on a multidisciplinary expertise and hands-on experience across four main industrial domains.</p> <p>Stam collaborates with different regions in Italy with a focus on Liguria, Veneto, Sardinia, Campania and Apulia.</p> <p>STAM collaborates with Regional Development Agencies, Clusters, Competence Centers, Digital Innovation Hubs and Universities to animate communities through a set of added value services delivered and scaled/up through digital tools and Platforms.</p>
Previous experience in European projects	<p>(Give titles of projects, a brief overview of them, and explain the activities that your organisation carried out in the project)</p> <p>Stam was involved in 49 H2020 projects during the last 7 years with several of them dealing with Open Innovation and Digital Transformation. In particular Stam is involved in 4 Open Innovation Test Beds projects dealing with multifunctional materials, sustainable processes, manufacturing and (bio)circular economy. Stam is also involved in two Digital Innovation Hubs projects funded within the I4MS initiative.</p> <p>The role of Stam in the projects above is to develop the digital tools and/or animate SMEs and ecosystems, acting in some cases as Single Entry Point for the delivery of the services and the aggregation of the offerings.</p>
Interests for future projects proposals	<p>We are interested in those projects where we could involve the private-public organisations and stakeholders from our 700+ wide network as well as co-designing and developing solutions which are based on global solutions, integrating the best tools in the market, but customised on local specificities and dynamics. Our practical</p>

	experience with sustainable business models combining the digital and physical dimensions around platform is an asset we could contribute.
Project ideas	We are interested in discussing opportunities which are focused on connecting regional ecosystems and create value for the benefits of SMEs and local stakeholders, connecting the dots and aggregating new value propositions which facilitate collaboration across EU.
3 key words	Open Innovation, Support to SMEs, Digital tools and platforms
